Our Mission

4 Key Points.

Collaboration — A space where students from all backgrounds work and grow together.

Hands-On Learning — Real experiences in robotics, design, and teamwork.

Inspiration — Igniting curiosity and creativity in every student.

Accessibility — Most of our funding comes from sponsors and fundraisers, ensuring all students can participate.

SPONSOR BENEFITS

Supporting MMHS Robotics can grant you access to a large audience of potential customers through various **perks**.

Social Media Post	Dedicated post	Dedicated Post + Video
Banner Space	8" x 8"	10" x 10"
Website Space	Large Logo	Logo + Company description
Robot Sticker	Yes	Yes

Empower Tomorrow's Innovators, Today.

Our robotics team is more than just a club. At Milliken Mills High School, we are building a student-led community where young people can explore engineering, programming, design, leadership, and teamwork through hands-on robotics.

In a world where technology is shaping the future, we want to give students the chance to do more than just learn about STEM – we want them to experience it, build with it, and grow through it.

Will you join us in this mission? Will you stand with us as we inspire the next generation of engineers, programmers, innovators, and leaders?

The future is waiting. Are you ready to help shape it?

9569 Silver Knights

"The best way to predict the future is to create it." - Alan Kay
